
Welcome to
Fast-track your 2.4GHz product development thanks to STM32 wireless services

Introduction and agenda
Start at 9:30 am CET

Workshop team

STM32

Team Introduction

Aniss ABDELLAOUI - ST Paris
SW Application Engineer Wireless microcontrollers

Dominique FOLLEZOUR – ST Rennes
SW Application Engineer Wireless microcontrollers

Lubos KOUDELKA – ST Prague
SW Application Engineer Wireless microcontrollers

Miroslav DLOUHY – ST Prague
RF Application Engineer

Vit STEPANEK – ST Prague
Application manager, Wireless microcontrollers

Yvon RANNOU – ST Munich
Technical marketing Microcontrollers

One special guest – The customer voice

Daniel DERRIEN
Wireless sensor developer at My Company.

“What can STMicroelectronics offer me to add wireless connectivity to my product ? ”

Purpose of the workshop

- Highlights **STM32 wireless portfolio** and its **flexible ecosystem** addressing any 2.4GHz wireless applications.
- Show case all **ST resources and services** available for new projects with wireless, starting from Proof Of Concept (POC), up to final certification
- Demonstrate **how ST could help you** in real world (with live demos) to address all development phases of a project with wireless connectivity
- **Meet some ST RF experts** from our RF Lab and answer to some challenges around RF designs

Live Demo

Agenda (9:30 – 11:00)

1	10 min	Introduction
2	30 min	ST Support during **your POC project** with STM32 wireless
3	30 min	ST support during **your design** with STM32 wireless
4	15 min	**Additional ST support** capabilities
5	5 min	Takeaways, Q&A

Payoff of the workshop

- Have better understanding of **STM32 wireless portfolio** and its flexible **ecosystem** addressing any 2.4GHz wireless applications.
- **Be aware of ST resources and services** available for your new projects with wireless.
- Understand how to take advantage of **ST support and services** during all your product design phases, from prototyping up to industrialization
- **Experience ST technical support and expertise** during all development phases of a project with wireless connectivity

Remote workshop **Rules**

- If not speaking **please make sure to be muted** (we'll mute all in beginning).
- **Use CHAT window** of the Teams meeting to ask questions or highlight a problem during all the chapters and hands-on exercises.
- Don't use any AI tools / plug-ins to monitor this session. **All slides and recording will be shared with you** in a post event email.

LET’S START!!!
